Summer Research Assistant Opportunity

Job Description:

We are looking to hire a summer research assistant to work for Professor Stephen Salant in the project: “New Prescriptions for the Pharmaceutical Industry”. The goal of the project is to better understand the economic implications of increasing decentralization in the pharmaceutical industry. The RA will be writing MATLAB code to model strategic interactions between pharmaceutical producers. Previous work on this project won a Best Poster Prize at the 2015 MITRE Student Poster Symposium.

Requirements:

MATLAB proficiency

Workload and Compensation:

Compensation will be hourly pay. Hours are flexible, and can range from 10-20 hours per week depending on research progress and the RA's availability. Work will be done over the summer.

If you're interested, please send your resume, unofficial transcript, and a MATLAB code sample with a description of what the code does to ssalant@umich.edu and yichuanw@umich.edu. A copy of the past poster can be found at http://bit.ly/22JhfDg
