

Lois Zook Levy Award

A Memorial Award has been established in the Department of Mathematics in the name of Lois Zook Levy by her husband (Hiram) and sons (Joshua and Adam) to honor her memory, her life-long love of mathematics and her commitment to education.

The Award will be given annually to an outstanding graduating mathematics student who plans to teach mathematics at the K-12 level. It is intended to recognize Lois's love of the University of Michigan and teaching and to emphasize the importance of developing knowledgeable and dedicated teachers of K-12 mathematics.

Along with her immediate family, more than 50 friends, family and associates have contributed to the Award's endowment.
