

**Homework 6. Due Oct. 29**

**Remark.** There are 11 problems but many are really very short. The goal is to be able to manipulate series to get new series from old while using the basic theory to describe where they converge.

142/3,5

149-150/2,4,5,8,11

172-173/2,7,11,13
